# Summary Report for: Waldron Park Pond Improvements

## Agreement # 2418

### Background/Objective

The Waldron Park Pier is the site of a community park & fishing pier nestled in a neighborhood located in Corpus Christi's Flour Bluff area. The pier has historically been stocked with rainbow trout by the Texas Parks and Wildlife Department and is a popular fishing spot. Over the span of forty (40) years, the pier has withstood severe weather, graffiti, and vandalism and has been in dire need of improvement.

The City of Corpus Christi, Park Operations construction team rebuilt the pier in just over two (2) months with the financial help of the Coastal Bend Bays & Estuaries Program (CBBEP).

### Waldron Park Pond and Pier located in Flour Bluff, Texas

## **Installation**

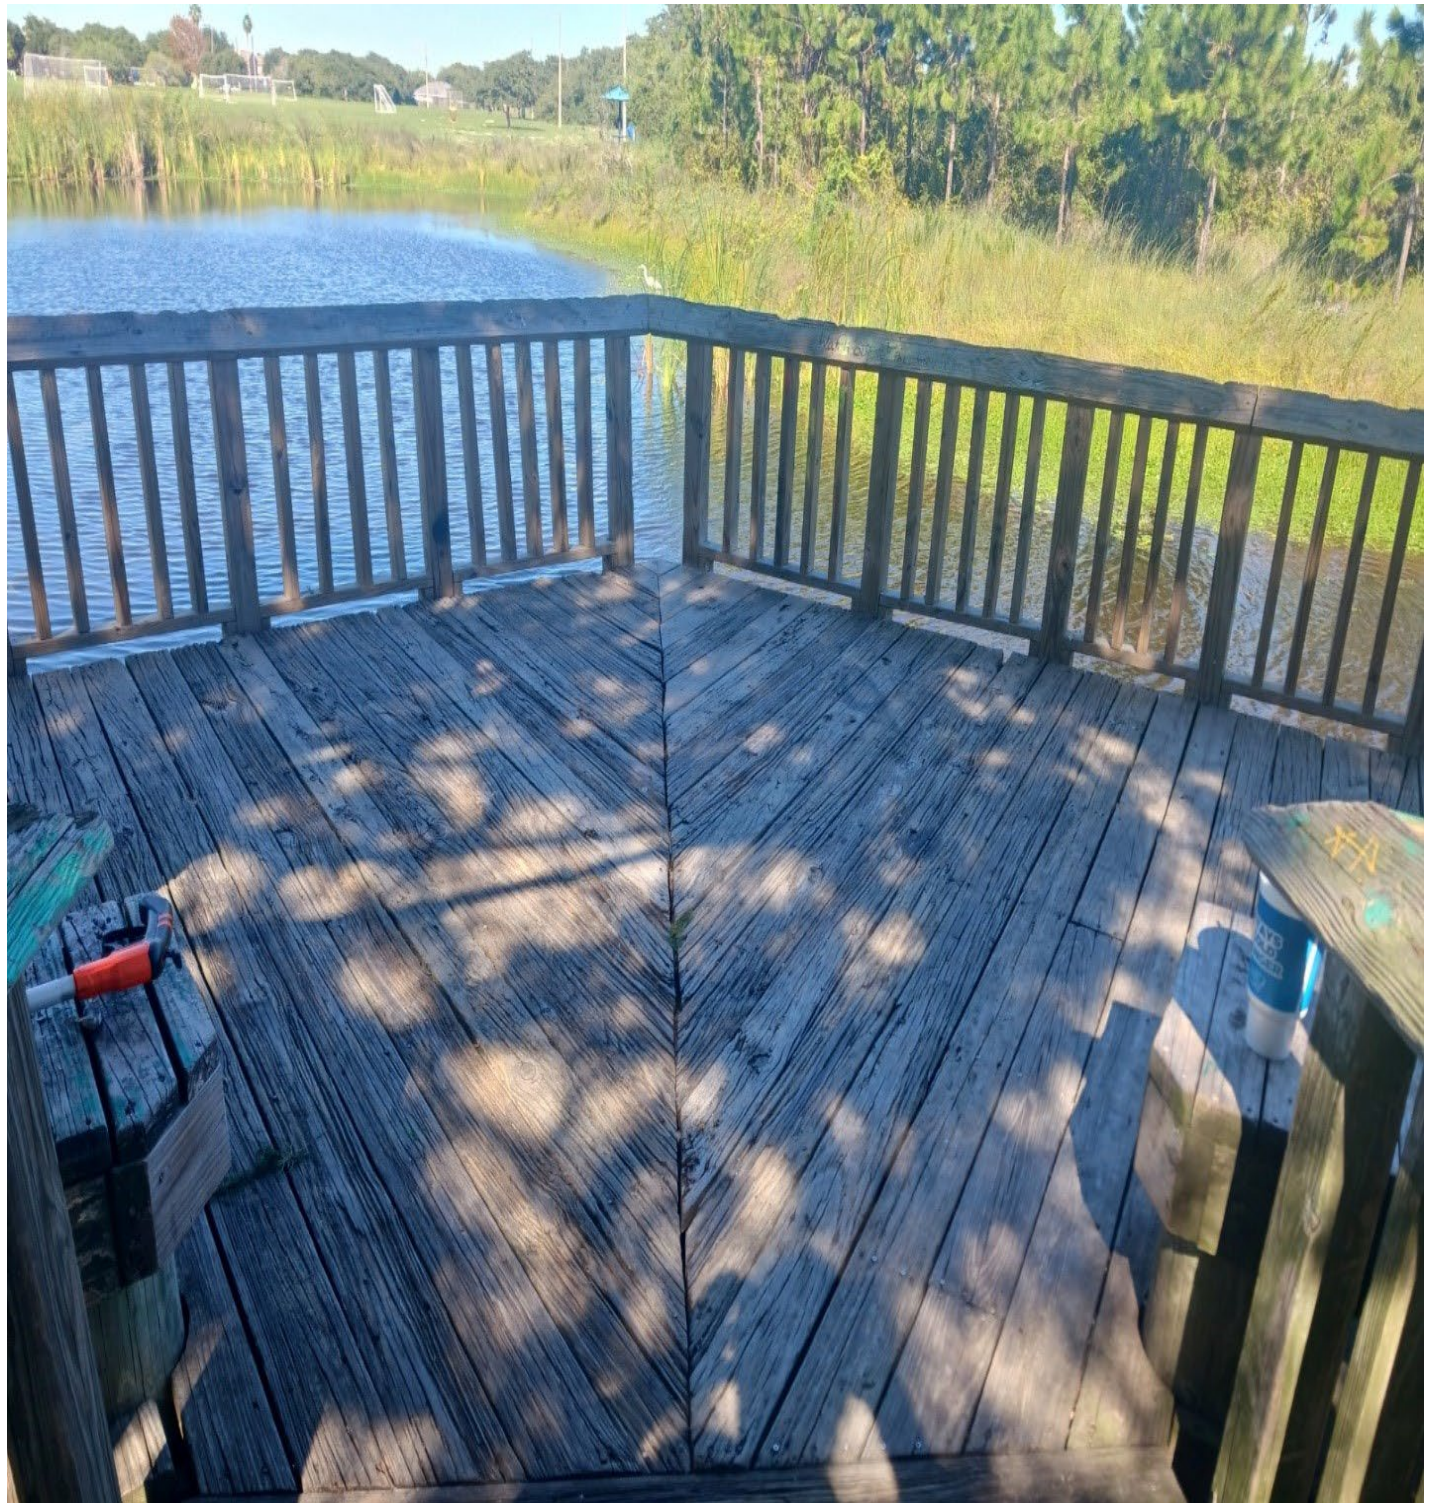

Upon initial inspection, it was found that the pier's pylons did not need to be replaced. However, all floor joists, decking, railings, and benches were removed and replaced with treated pine & Southern Pine lumber. The hardware was replaced using stainless steel hex bolts, stainless steel nuts & stainless-steel washers. These materials were chosen to extend the life of the rebuilt pier allowing for its use by the public for many years to come.
